

**A Report on Technical Talkon Industry Institute Interaction**

A Technical talk on “Industry Institute Interaction” was conducted on 14th October 2020 at CADD Lab under the guidance of Dr.G.RManjunath, Head of the Department-Civil Engineering. General Manager of Dalmia Cement, Venkataram Reddy visited our college to deliver a lecture on Technical Education forms, interaction between institute and industry, global completion and unemployment.

He explained about bridging gap between industry and institute, promotion and coordination of consultancy services, use of resources from industries and institute for benefit of industries, students and society, creation of industries institute expertise database, training and knowledge update through faculty exchange, joint R & D activities, short-term courses for manpower development etc. causes of poor interaction like lack of interest from both sides, curriculum is not planned as per the job profile, insufficient teaching time and learning time because of late admissions and more number of holidays. Obsolete lab facilities do not attract industry to interact with the institute. Mode of interactions like Institute to Industry. Industry to Institute. Industry- Institute joint efforts and other strategies. Industry-Institute Joint Efforts. Benefits of Industry Institute Interaction like-greater resource generation, Improved quality of faculty, More relevant curriculum, Better Placement of students, Better utilization of expertise and facilitated industry. Students should be encouraged to undertake the final year projects in Industry partly or fully with a joint supervisor from industry. Industry should give R&D problems to Institute and also provide good training to students under training as they are going to be the important part of industry after completion of the studies. Experts from the industry should be invited by the Institute regularly to share their practical knowledge with the faculty and students.
