# SAPTHAGIRI COLLEGE OF ENGINEERING

### **DEPARTMENT OF PHYSICS**

#### **COURSE OUTCOME (CO'S)**

### Scheme 2021

# Engineering Physics (21PHY12/22)

At the end of the course the student will be able to

C01.	Interpret the types of mechanical vibrations and their applications, the role
	of Shock waves in various fields.
CO2.	Demonstrate the quantization of energy for microscopic system.
CO3.	App[y LASER and Optical fibers in opto-electronic system.
CO4.	Illustrate merits of quantum free electron theory and applications of Hall
	effect.
C05.	Analyze the importance of XRD and Electron Microscopy in Nano material
	characterization.

# **Engineering Physics Lab (21PHYL16/26)**

At the end of the course pupil will be able to

C01.	Understand the measuring techniques
CO2.	Operate different instruments and be capable to analyse the experimental
	results.
CO3.	Construct the circuits and their analysis.

#### **PROGRAM OUTCOME**

- **PO1.** Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2. Problem analysis**: Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3. Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO4.** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5.** Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- **PO6.** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7.** Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8.** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9.** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10.** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11. Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12.** Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
